

U.S. ARMY :
FORT BRAGG : NORTH CAROLINA

Fort Bragg is one of the Army’s premier installations and among the most actively used military complexes in the world, home to the 82nd Airborne and U.S. Army Special Operations Forces. Fort Bragg is also home to rare, mature longleaf pine habitat for the federally endangered red-cockaded woodpecker (RCW). Meanwhile, the 2005 Base Realignment and Closure realigned up to 40,000 troops and their families—along with the resulting economic growth—to the post, increasing the challenges of managing growth in the North Carolina Sandhills area.

When habitat-destructive residential development occurred years ago immediately adjacent to Fort Bragg’s training areas, particularly along the southern installation border, the Army was compelled to set aside training land exclusively to protect dwindling RCW habitat. Since then, Fort Bragg has helped pioneer conservation buffer partnering by creating the

North Carolina Sandhills Conservation Partnership. This partnership helped provide a model for REPI partnerships.

Fort Bragg’s efforts with The Nature Conservancy and other stakeholders helped achieve the recovery target for the sandhills RCW population segment, the first such documented recovery of a RCW sub-population. As the population recovers, restrictions placed on used training land at Fort Bragg are being virtually eliminated. The preserved habitat has provided a number of other additional benefits to Fort Bragg and the surrounding community, including expanding Cumberland County’s only state park.

BENEFIT SUMMARY

COMMUNITY

- Preserves working lands for forestry, benefiting the local economy
- Provides habitat for endangered species
- Provides recreational opportunities
- Helps preserve water quality
- Augments regional planning objectives

MILITARY

- Preserves live-fire and maneuver training capacity
- Prevents workarounds that would reduce training realism or effectiveness

Development adjacent to the installation perimeter (top). Landowner Julian Johnson values the protection of longleaf pine on his property (bottom).

KEY PARTNERS

- The Nature Conservancy
- U.S. Fish and Wildlife Service
- North Carolina Wildlife Resources Commission
- Sandhills Ecological Institute
- North Carolina Department of Agriculture
- North Carolina Division of Parks and Recreation
- National Fish and Wildlife Foundation

FAST FACTS AS OF 30 SEP 13

- » Acres preserved: **17,071**
- » Transactions conducted: **52**
- » Partner cost share: **64%**
- » Project status: **In Progress**
