

## GUAM REGION-WIDE NAVY PROJECT

**Guam is home to several installations and annexes, including Naval Base Guam, Andersen Air Force Base, and the newly reactivated Marine Corps Base Camp Blaz, whose missions align closely with National Defense Strategy priorities.**

Naval Base Guam provides critical logistics support to the U.S. Pacific Fleet and is the only installation in the region that can be used for berthing, ship operations and maintenance, refueling, and ordnance handling. Additionally, Naval Munitions Site is the largest ordnance facility in the Pacific and encompasses two land-based training areas. However, these important missions are facing increased development pressures and increased climate-related threats.

Guam is also home to a high concentration of threatened and endangered species impacted by the continued degradation of habitat across the island. Regulatory restrictions in place as a result of reduced habitat for these species can impact military training and operations where species may take refuge within military operating areas. To alleviate these impacts,

the Navy is partnering with the Government of Guam, U.S. Fish and Wildlife Service, and the National Fish and Wildlife Foundation to implement ecosystem-level habitat recovery and restoration activities in off-base locations to support species recovery goals. A crediting strategy is being developed to consider the ecological benefits of off-base conservation activities and provide opportunities for streamlining federal consultation processes; paving the way for enhanced species conservation.

This project supports the goals and objectives of species recovery and forest restoration plans and provides benefits to important cultural resources on Guam. The project's focus on preserving contiguous areas of protected habitat will also include watershed management activities to reduce erosion and improve the quality of local water resources and the near-shore environment.

### BENEFIT SUMMARY

#### COMMUNITY

- Protects cultural resources
- Preserves and enhances water resources
- Protects habitat for multiple threatened, endangered, and candidate species

#### MILITARY

- Supports multiple Service missions
- Helps avoid and reduce workarounds and restrictions on training

### FAST FACTS FROM FY 2021 THROUGH FY 2023 | Project Status: Initiated

Authority	Transactions	Acres Protected, Managed, or Improved	Total Funds Expended
10 U.S.C. § 2684a	–	–	\$0.2 million
Other (e.g., Sikes Act, IGSA)	–	–	\$5.6 million
<b>TOTAL</b>	–	–	<b>\$5.7 million</b>

Subtotals may not sum to combined totals due to rounding. | This project has expended REPI funds to support the ongoing management or improvement of lands outside the installation.

*To protect the Guam Micronesian Kingfisher (top), a critically endangered endemic bird, the Government of Guam is partnering with DOD to secure off-base protected habitat, preserving the species as well as military training activities, such as those taking place at U.S. Naval Base Guam at Apra Harbor (bottom).*
