

### OVERVIEW

In Fiscal Year (FY) 2022, the state of Connecticut received \$22.3 billion in Defense spending, which provides direct funding for the Department of Defense (DOD) personnel salaries, defense contracts, and construction of military facilities in the state. This spending by DOD personnel, contractors, and their families creates significant economic activity, attracts related industries and investments, and generates important state and local government tax revenues.

The Readiness and Environmental Protection Integration (REPI) Program is a key tool used by DOD and its partners to protect the military's ability to train, test, and operate in the state. The Department created the REPI Program in response to the development of lands and loss of habitat in the vicinity of or affecting its installations, ranges, and airspace that can lead to restrictions or costly and inadequate training and testing alternatives. Through the REPI Program, DOD works with state and local governments, conservation organizations, and willing private landowners to address these challenges to the military mission and the viability of DOD installations and ranges. The REPI Program has benefited from broad bipartisan support both in the U.S. Congress and among groups representing state and local officials. From FY 2011 through FY 2023, DOD and its partners have contributed over \$1.7 million to REPI projects supporting one installation in Connecticut.

### REPI PROJECTS\* IN CONNECTICUT

**Funding Summary** (from FY 2011 through FY 2023)

Subtotals may not sum to combined totals due to rounding.

\* REPI projects refer to any action authorized by 10 U.S. Code (U.S.C.) § 2684a to include the acquisition of real property interests in land from willing landowners to prevent development pressures, protect habitat, improve military installation resilience to climate change and extreme weather events, or any other natural resources management. REPI projects involving the Army or Army National Guard are also termed Army REPI partnerships. Those involving the Navy, Marine Corps, or Air Force, are also termed encroachment partnering agreements. Eligible entities include conservation organizations and state and local governments.

**Total Acres Protected (FY 2011 through FY 2023): 54**

## MILITARY PRESENCE

- New London, Connecticut, is home to the U.S. Coast Guard Academy, **one of the five U.S. federal military academies**. Every year, approximately 200 graduates are commissioned as Coast Guard Officers to help ensure the safety, security, and stewardship of the nation's waters.
- Naval Submarine Base New London, "Home of the Submarine Force" is the **primary East Coast submarine base**.
- The 99<sup>th</sup> Regional Support Command's Middletown Armed Forces Center is home to soldiers from the Army Reserve and Connecticut National Guard and includes a **state-of-the-art facility to provide units training and classroom resources** while boosting the local economy.
- The defense portion of the FY 2023 Consolidated Appropriations Act allocates \$6.5 billion for the two-per-year build rate of Virginia-class submarines, comprising \$4.5 billion for two submarines in 2023 and \$2 billion in advance procurement for submarine construction in 2024 and 2025. In Connecticut, these appropriations signify a substantial investment in naval capabilities.

## REPI PROJECTS

Installation	County	Congressional District
99th Armed Forces Reserve Center	Fairfield	1st

## 99<sup>TH</sup> ARMED FORCES RESERVE CENTER

### The 99<sup>th</sup> Regional Support Command's Middletown Armed Forces Reserve Center is home to soldiers from the Army Reserve and Connecticut National Guard.

The Armed Forces Reserve Center was constructed after the Base Realignment and Closure recommendation to consolidate all Army Reserve and National Guard facilities in Connecticut. The new, state-of-the-art facility provides Reserve and National Guard units training and classroom resources, while boosting the local economy.

Unfortunately, construction of the Armed Forces Reserve Center impacted approximately 1.6 acres of wetlands. Therefore, to obtain the necessary approval under Section 404 of the Clean Water Act, the Army Corps of Engineers required a wetlands mitigation process to address the impacted wetlands. With no wetland banks or in lieu fee programs in the state of Connecticut, the Army decided to work with the Middlesex Land Trust to protect an appropriate site in perpetuity suitable for wetland mitigation.

The acquisition of 54 acres of wetlands will directly compensate for the loss of wetlands on-post. The Middlesex Land Trust will own and manage the property for conservation purposes, meeting the mutual goals of the land trust and the Army. Their management will include long-term habitat management and ensuring that the terms of the deed are met in accordance with the final mitigation plan, providing opportunities to enhance water quality and control invasive species. Through this project, the Army and its partners have benefited the local community, the environment, and national defense.

### BENEFIT SUMMARY

#### COMMUNITY

- Brings together new partners
- Preserves habitat and wetlands
- Helps preserve water quality

#### MILITARY

- Supports new training facility for physical fitness and weapons simulation training

The new Armed Forces Reserve Center serves as a "virtual installation" for Army Reserve soldiers from Maine to Virginia (top). Construction of the new building prompted wetlands mitigation efforts (bottom).
