

REPI

UNITED STATES DEPARTMENT OF DEFENSE
READINESS AND ENVIRONMENTAL
PROTECTION INTEGRATION PROGRAM

STATE FACT SHEETS | INDIANA

INDIANA

OVERVIEW

In Fiscal Year (FY) 2023, the state of Indiana received \$6.4 billion in Defense spending, which provides direct funding for the Department of Defense (DOD) personnel salaries, defense contracts, and construction of military facilities in the state. This spending by DOD personnel, contractors, and their families creates significant economic activity, attracts related industries and investments, and generates important state and local government tax revenues.

The Readiness and Environmental Protection Integration (REPI) Program is a key tool used by DOD and its partners to protect the military's ability to train, test, and operate in the state. The Department created the REPI Program in response to the development of lands and loss of habitat in the vicinity of or affecting its installations, ranges, and airspace that can lead to restrictions or costly and inadequate training and testing alternatives. Through the REPI Program, DOD works with state and local governments, conservation organizations, and willing private landowners to address these challenges to the military mission and the viability of DOD installations and ranges. The REPI Program has benefited from broad bipartisan support both in the U.S. Congress and among groups representing state and local officials. In FY 2024, DOD and its partners have contributed nearly \$2.2 million to REPI projects supporting one installation in Indiana.

REPI PROJECTS* IN INDIANA

Funding Summary (in FY 2024)

Subtotals may not sum to combined totals due to rounding.

* REPI projects refer to any action authorized by 10 U.S. Code (U.S.C.) § 2684a to include the acquisition of real property interests in land from willing landowners to prevent incompatible development or improve military installation resilience. REPI projects involving the Army or Army National Guard are also termed Army REPI partnerships. Those involving the Navy, Marine Corps, or Air Force, are also termed encroachment partnering agreements. Eligible entities include conservation organizations and state and local governments.

Total Acres Protected (in FY 2024): 532

MILITARY PRESENCE

- Naval Support Activity (NSA) Crane is located in southwestern Indiana and covers more than 97 square miles of forested, hilly terrain.
- NSA Crane's 460 acre Lake Glendora Test Facility (LGTF) is located 45 miles northwest of the NSA Crane main site and hosts over a dozen tenants including the Naval Surface Warfare Center Crane Division's Strategic, Expeditionary and Electronic Warfare engineering and technical support missions and Crane Army Ammunition Activity's ordnance storage, distribution, demilitarization, and production missions.
- The Indiana Air National Guard's 122nd Fighter Wing yields a substantial economic impact, totaling \$63.5 million in Allen County, \$94.1 million across the 10 northeastern counties of Indiana's 3rd Congressional District, and an estimated \$113 million statewide, encompassing various operational expenditures such as payroll, utilities, food, and education.

Working and natural land buffers protect Ordnance logistics & demilitarization missions (left) and NSA Crane Engineering & Technical support missions (right) from negative impacts of traffic congestion and noise and vibration complaints.

Key REPI Partners

- American Farmland Trust
- Daviess-Martin Joint County Parks and Recreation Department
- Indiana University Conservation Law Center
- Indiana University Environmental Resilience Institute
- National Fish and Wildlife Foundation
- Oaubache Land Conservancy
- Southern Indiana Sentinel Landscape
- State of Indiana
- State of Indiana Office of Community and Rural Affairs
- State of Indiana Office of Defense Development
- Sycamore Land Trust
- The Conservation Fund
- The Nature Conservancy
- The George Rogers Clark Land Trust
- U.S. Department of Agriculture — Natural Resources Conservation Service
- WestGate Authority
- White River Military Coordination Alliance

NAVAL SUPPORT ACTIVITY CRANE/LAKE GLENDORA TEST FACILITY

Naval Support Activity (NSA) Crane is located in southwestern Indiana and encompasses more than 97 square miles of forested, hilly terrain.

NSA Crane hosts over a dozen tenants, including the Naval Surface Warfare Center (NSWC) Crane Division's Strategic, Expeditionary and Electromagnetic Warfare engineering and technical support missions and Crane Army Ammunition Activity's (CAAA) ordnance storage, distribution, demilitarization, and production missions. NSA Crane's 460 acre Lake Glendora Test Facility (LGTF) is located 45 miles northwest of the NSA Crane main site.

A new interstate highway and regional economic growth have increased the likelihood of commercial, residential, and population developments near the NSA Crane main site and LGTF. This REPI project protects the agriculture, forest, and grasslands surrounding NSA Crane's main site and LGTF while supporting their military missions. A number of collaborative activities provide structure for partner contributions, including a complete Joint Land Use Study (JLUS) in 2017 and the establishment of a Post-JLUS Implementation Committee in 2018. The White River Military Coordination Alliance and a multi-year encroachment partnering agreement were also established in 2018. In addition, REPI partners and stakeholders have developed a Conservation Incentive Web Tool and Communications Plan to support the objectives of this project. In 2022, over 3.5 million acres in Southern Indiana, including NSA Crane and LGTF, were designated within the Southern Indiana Sentinel Landscape.

The expanded landscape-scale partnership is strengthening military readiness and resiliency, conserving natural resources, protecting critical habitat, enhancing America's working lands, and helping prepare Indiana for environmental changes.

BENEFIT SUMMARY

COMMUNITY

- Protects agricultural lands
- Protects natural lands
- Preserves habitat for threatened, endangered, & at-risk species
- Preserves water quality and protects water supply

MILITARY

- Protects small arms & ordnance testing and demilitarization missions that produce significant amounts of noise and vibration
- Prevents workarounds that would reduce test capacity
- Allows for future mission growth

Working and natural land buffers protect NSA Crane Engineering & Technical support missions (top) and Ordnance logistics and demilitarization missions (bottom) from negative impacts of traffic congestion and noise and vibration complaints.
