

FORT EISENHOWER

Fort Eisenhower, located in Augusta, Georgia, is the largest communications training facility in the Armed Forces and is the focal point for the development of tactical communications and information systems with the Signal Corps and Signals Intelligence.

The post also has a new National Security Agency facility, which recently added new jobs—bringing with it development pressures to house a growing population.

Additionally, Fort Eisenhower supports various light to heavy maneuver and live-fire training activities on its training ranges.

Meanwhile, Fort Eisenhower is surrounded by highways inviting sprawl emanating from Augusta to continue closing in around the post. This leads to complaints about noise and vibrations from artillery and other live firing, as well as air quality issues from

the smoke of training obscurants and prescribed burning of longleaf pine habitat and underbrush. So Fort Eisenhower is working with its partners to protect the remaining large parcels of undeveloped forest land near its ranges in hopes of alleviating the risk of encroachment further impacting training capabilities.

An important aspect of this project is the opportunity to preserve and restore the longleaf pine ecosystem that supports species like the endangered red-cockaded woodpecker and the candidate species gopher tortoise. Preventing the gopher tortoise and others from becoming listed species will protect Fort Eisenhower training mission from new restrictions. Another benefit is the protection of high priority water areas, helping to sustain aquatic biodiversity.

BENEFIT SUMMARY

COMMUNITY

- Supports regional planning efforts, including implementation of a Joint Land Use Study
- Preserves habitat for threatened, endangered, and at-risk species
- Protects water supply
- Protects working lands

MILITARY

- Preserves live-fire, maneuver, and aviation training that produces significant noise
- Prevents workarounds that would reduce training realism
- Allows for mission growth

Medical personnel practice loading simulated casualties onto a HH-60M Blackhawk helicopter (top). Some training occurs near the longleaf pine ecosystem near Fort Eisenhower (bottom).

KEY PARTNERS

- Central Savannah River Land Trust
- Georgia Department of Natural Resources
- The Nature Conservancy

FAST FACTS THROUGH 30 SEP 2022

- ACRES PRESERVED: 114
- TRANSACTIONS CONDUCTED: 1
- TOTAL FUNDS EXPENDED: \$205 thousand
- PROJECT STATUS: Completed
