

OVERVIEW

In Fiscal Year (FY) 2024, the state of Virginia received \$76.2 billion in Defense spending, which provides direct funding for the Department of War (DoW) personnel salaries, defense contracts, and construction of military facilities in the state. This spending by DoW personnel, contractors, and their families creates significant economic activity, attracts related industries and investments, and generates important state and local government tax revenues.

The Readiness and Environmental Protection Integration (REPI) Program is a key tool used by DoW and its partners to protect the military's ability to train, test, and operate in the state. The Department created the REPI Program in response to the development of lands and loss of habitat in the vicinity of or affecting its installations, ranges, and airspace that can lead to restrictions or costly and inadequate training and testing alternatives. Through the REPI Program, DoW works with state and local governments, conservation organizations, and willing private landowners to address these challenges to the military mission and the viability of DoW installations and ranges. The REPI Program has benefited from broad bipartisan support both in the U.S. Congress and among groups representing state and local officials. From FY 2007 through FY 2025, DoW and its partners have contributed over \$228.8 million to REPI projects supporting eight installations in Virginia.
